

PVC-R made from 100% recycled PVC

from
Precision Card Services

PVC-R from Precision Card Services is a made from 100% recycled PVC substrate suitable for all card applications from loyalty, gift and membership to hotel key cards and everything in between!

What is PVC-R?

PVC-R is a rigid PVC film produced with 100% recycled PVC.

The raw materials used come from EU industrial wastes like printing, packaging and so on.

The material is collected from licensed companies which select it according to specific parameters making it suitable for the calendering and card production processes.

Not only is it made from 100% recycled PVC, but it can be recycled after use.
